

## Garden of Life

Garden of Life chooses quality materials from all over the world including Europe, South America, North America, and Asia. Our raw materials are tested for potency and contamination including heavy metals and pathogenic microorganisms.

We have an extensive quality program that surpasses many industry standards in order to deliver the best product to our customers. Some of our material does come from China, including USDA Certified Organic Green Tea as well as other materials that originate in China but undergo fermentation in the United States prior to being used in the finished products you enjoy every day.

Our premium quality products are manufactured in carefully selected facilities in the US. We work with manufacturers who have the highest quality standards and follow GMP (Good Manufacturing Practice) set by the FDA. All raw materials purchased have strict specifications and are required to meet those specifications. We obtain Certificate of Analysis for all raw materials and will verify these with independent laboratories. The number of tests depends on the product. All products are retested again before release. A system of audits and site visits to manufacturers along with strict document control procedures help us achieve our goal of providing the highest quality products to our customers.

We are committed to our customer's health and wellbeing, and we actively monitor the quality of every ingredient that goes into our products.

For updated information on Garden of Life's products I invite you to sign up for our "Extra Ordinary Health" Newsletter. To sign up, clicking on the following link;
