

Life Enhancement Products

"The raw materials purchased and used by Life Enhancement Products, Inc. are the safest, highest-quality, pharmaceutical-grade ingredients available in the world. We package under the purest possible clean-room conditions, and materials undergo lab testing to confirm purity greater than 98% (or we reject them!). There are a number of standards with which we comply, including the United States Pharmacopeia and the National Formulary (USP/NF), the Food Chemical Codex (FCC), and others, depending on the supplement. Some of the ingredients we use significantly exceed these standards."

"As a consumer this means you are assured that all products carrying the Life Enhancement Products logo are the freshest, purist, highest quality supplements available on the market."
